

People who use "Red Rose" are usually those who like tea of extra good quality

## RED ROSE TEA "is good tea"

The ORANGE PEKOE is extra good. Try it!

### The Coming General Election

The outstanding event of the week in which this article is written was the dissolution of Parliament and the calling of a general election to take place next month to choose a new House of Commons. This is a matter in which every citizen of Canada is vitally interested regardless of individual party views and affiliations or position occupied in the economic life of the Dominion.

The fortunes of political parties are not the concern of this particular column; what we are concerned about are the fortunes of the Dominion of Canada, and, in particular, of Western Canada because of a profound conviction that it will only be through the settlement, the development, the prosperity of this vast western land that permanent growth and prosperity will come to the Dominion as a whole. Support given, or opposition voiced, in this election to any given policy in the past, or that may be given or voiced in the future, is not because such policy may originate with any particular political party, but because of its bearing on Canada's progress and prosperity.

In the coming election, as in all elections, many conscientious voters will find themselves in somewhat of a quandary just how to mark their ballot paper. They not only will be called upon to choose from among the candidates offering for election the man or woman to be their representative at Ottawa, but, while making that choice, they must also render a verdict on the larger national issue of the policies and group of men they desire to rule at Ottawa.

Because of this double responsibility, many voters find themselves in difficulties. If it was merely a case of selecting their local representative, the task would be comparatively simple, namely, voting for the candidate who in their judgment was the most upright, the ablest, best informed and most intelligent, and therefore likely to prove the most capable representative. But it not infrequently happens that this particular candidate is standing in support of policies and leaders which the individual voter is not prepared to support, while a less capable man is the candidate supporting policies and leaders in which he has confidence. The problem is there, but in the final analysis it must be decided by the voter.

One thing the individual voter can do, and that is to use all his influence to secure the selection of a candidate in whom he has every confidence as a local representative by the party whose policies he supports and in whose leaders he has confidence. Such action on his part is one of the duties of citizenship which the individual voter owes to his country.

Another course of action on the part of the individual voter is to refrain from pledging his support to any one candidate until all the candidates are in the field, and the opposing policies of the contending parties are clearly outlined and understood. Nobody should pledge such a valuable thing as their vote "in the dark" and without full knowledge of all the facts which have a bearing in the election.

In the approaching election there is another and grave consideration which must influence the voter in the marking of his ballot. Since Confederation, with the exception of the last four years, the party in power at Ottawa, whether Liberal, Conservative or Unionist, has always commanded a substantial and working majority. It was able to govern, and it was guilty of neglect and failure to grapple and deal with national problems, the responsibility rested squarely on its shoulders.

During the past four years the Government of the day did not possess such a majority. The House of Commons was divided into three distinct groups, each with policies of their own. The outstanding feature of Conservative policy was wholly unacceptable to the Progressive group and to the vast majority of the Government following; the principles and primary features of Progressive policy were equally unacceptable to the Conservatives and to a certain section of the Liberals. Inasmuch as the Government of the day had to depend upon the support of one group or the other, a deadlock usually resulted, and party considerations and manoeuvrings became paramount to the national welfare and progress.

As a result, Canada has drifted at a time when decisive action was urgently needed. Everybody recognizes the situation. The Opposition make it a charge against the Government; the Government admits the situation has existed but holds itself blameless in view of the conditions which confronted it.

Great Britain suffered from exactly the same situation until an election became imperative. Then the people put an end to an impossible situation by returning one party with an overwhelming majority and a clear mandate to govern. In the last United States election the voters were faced with a similar problem, and they, too, decided in the interests of good government to give one group a clear and substantial working majority.

In the election next month the voters of Canada must face this issue and decide it. Regardless of the outcome of the voting, it is important that decisive action one way or the other be taken, and an end put to present indecision and drifting leading to worse than stagnation in the development and carrying into effect of policies and reforms calculated to promote the national welfare.

### Latest Triumph Of British Optical Industry

Make Better Lenses Than Any Other Country In World  
A cinematograph machine which will take 4,500 pictures a second is one of the latest triumphs of British makers of optical instruments. It can be used to show, for example, the effect of the impact of projectiles on armored plate.

This is only one of the many remarkable results achieved since the war which have placed the British optical industry far ahead of foreign rivals. Before the war, lenses ground in Germany were believed to be the best; now, British lenses are being bought by the German Government for German state institutions.

### Swollen Joints, Quickly Limbered Up

#### Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being this and not an oil preparation, it is able to penetrate quickly, and down it sinks into the tissues, carrying its healing, soothing action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness all vanish before the magic power of this wonderful ointment. Nearly fifty years of success proves the merit of Nerviline, which is sold every where in large 35 cent bottles.

Paper Made From African Grass  
Paper made from esparto, an African wild grass, has been produced by the bureau standards on a commercial basis and samples have been made available to American industry as a government test. The bureau's reports show that the imported grass pulp, after cleaning gave a 60 per cent yield of papermaking fibre.

### NEARING A BREAKDOWN

A Condition That Calls For a Reliable Tonic  
Many women give so much of their time to the cares of their household that they neglect their own health and sometimes reach the verge of a breakdown before they realize that their health is shattered. Often the heart palpitates violently at slight exertion, the stomach fails to digest food and discomfort follows. The nerves become weak and headaches grow more frequent. The body grows weak and there always depressed. This condition requires immediate treatment with such a reliable tonic as Dr. Williams' Pink Pills which enrich and build up the blood, carrying renewed energy to every part of the body. The value of Dr. Williams' Pink Pills in a rundown condition is proved by the following statement from Mrs. Alex. McInnes Bowman, River, Man., who says: "About a year ago I had a serious illness which left me very anemic. I was not able to get around to do my work; in fact I could scarcely walk. I was troubled with palpitation of the heart with the least exertion. One day a friend advised me to try Dr. Williams' Pink Pills as they had done her much good. I followed this advice and took the pills for some weeks when I felt as well as ever. I have since been able to attend to all my household duties. The dizziness and palpitation have left me and I bless the day I tried Dr. Williams' Pink Pills. They are just the medicine for those who are weak and rundown."

You can get these pills from any dealer or by mail at 60c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Riflemen Are Good Fighters

Are Holding Their Own Against France and Spain

The Riflemen tribesmen in Morocco will be able to maintain their independence against the French and Spaniards for some time, in the opinion of Sir Charles Hobhouse, former British army officer, and ex-postmaster-general, who has returned to London from inspecting the condition of the Rifian refugees at Tangier, on behalf of the League of Nations.

"Despite grandiose stories, the Rifians are holding their own against France and Spain," he told the news papers. "It will undoubtedly be a case of Europe against Africa, if the war is carried on, and it looks as if Africa will hold her own, and a little more."

"The Rifis are good fighters. They have up-to-date equipment, and their leader, Abd-el-Krim, is a man of remarkable military capacity."

### Last of the Peace Pipes

Antient Indian Curio Sent to New York From Saskatchewan  
Scattered in its original wrappings, some of the finer materials being hundreds of years old, one of the oldest relics on the American continent is now on its way to New York to its long rest in the museum of American Hero Foundation, an institution devoted exclusively to Indian relics.

D. A. Caldwell, curator of the museum, was in Regina recently after more than a month spent in the various reserves in Saskatchewan. He secured a mass of old knives, arrows, blankets, beads and other trinkets, but the prize he was after and secured was possibly the last of the peace pipes retained by the Crees.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the intestinal surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

### Chinese Law Very Strict

Offenders All Treated the Same in Their Courts

When Lord Palmerston, in 1833, tried to force a bill through the House of Commons to establish an extra territorial court in China in civil and criminal cases it was defeated through the opposition of Sir James Graham and other sound lawyers, who refused to be parties to the creation of a tribunal which would interfere with an "Independent power" like China.

As a matter of fact, the objection made to Chinese law by countries whose nationals got into trouble there was that it was too strict and too well enforced.

For example, all murders looked alike to the Chinese courts, and so drunken sailors ashore who killed somebody for fun naturally wished to be tried by European judges who would consider the mitigating circumstances.

It is about time for people to wake up to the fact that Chinese legal ideas, like her arts, were very advanced when Europe was a state of barbarism.—New York Telegram.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Insists Strictly Safety  
All steel railway cars are now being used on Indian railways. The change was not made for safety reasons but because insects also use the wooden cars rapidly.

### Tourist Traffic Extending North

Northern Rockies Will Be Mecca of World Tourist Traffic  
"World tourist traffic is tending north. This generation will see the time when the Northern Rockies will be the Mecca of the wealth and society of Europe and America. The next generation will see the development of Alaska as the centre of the world tourist traffic." This is the opinion expressed here by Louis W. Hill, president of the Great Northern Railway, and son of the famous founder of the road, James J. Hill.

Mr. Hill, who is motoring through the Canadian Rockies with William Kenney, vice-president of his road, expresses the hope that the United States will copy the superior park laws and highways which he has found north of the border.

As the one to whom credit is given for discovering and opening up Glacier National Park, Montana, Mr. Hill believes that good auto roads are now the strongest medium for developing the tourist possibilities of a country. Such roads as the Banff-Windermere highway will in the next generation stretch clear into the wilds of Alaska, he predicted.

### DON'T WAIT!

"All you get sick. Use Minard's—the great preventative."

## MINARD'S "KING OF PAIN" LINIMENT

Ottawa, in Canada; Sydney, Melbourne, and Perth, in Australia; and Pretoria in South Africa, all have the right to mint their own gold coins.

Corn is painful growths. Holladay's Corn Remover will remove them.

It has been decided by the Berlin courts that when an opera is broadcast the singers are entitled to demand a ten per cent. increase of salary.

Minard's Liniment used by physicians

The bones and muscles of the human body are capable of more than 1,500 different motions.

## WEEKLY NEWS BULLETIN

### New Milling Plant

Construction on the completion  
of Calgary's new milling plant being  
built by Spillers of England, has  
been started, and the plant will be  
ready to handle the crop of 1926.  
The completion of the plant will  
cost \$800,000, and there will be  
\$2,000,000 in machinery.

### World Poultry Congress

Alberta was represented last week  
by Hon. Geo. Hoadley, Minister of  
Agriculture, and J. H. Hare, Poultry  
Commissioner, at the meeting held  
in Toronto to consider plans for the  
world poultry congress to be held in  
Ottawa next year. Hon. Mr. Hoad-  
ley advocated formation of provincial  
committees to co-operate with the  
central committees to make the  
congress a success, and the plan  
was given support.

### Big Oil Output Continues

Royalite No. 4 well, in the Turner  
valley, 45 miles south-west of Cal-  
gary, is steadily maintaining its  
huge production of high grade nap-  
tha, as official figures on the August  
shipments from the well disclose.  
The figures are based on the actual  
shipments of naptha from the Black  
Diamond plant of the company to  
Okotoks and show that the total  
shipped during August was 515,285  
imperial gallons. This total, how-  
ever, includes approximately twelve  
thousand gallons of naptha produced  
by the absorption plant from wells  
1, 2 and 3, so that the net total  
shipped from the separator taking  
naptha from No. 4 well was about  
503,285 gallons. At 35 imperial  
gallons to the barrel this is approx-  
imately 14,379 barrels for August,  
or 463 barrels per day.

### Take Irrigated Farms

About 100 farmers have taken  
land in the Lethbridge Northern  
Irrigation district. About 60,000  
acres in this scheme are now under  
crop, an increase of 20,000 acres  
over the estimate for 1925.

### Former Alberta Man Honored

Charles A. Magrath, Chairman of  
the International Waterways Com-  
mission, and former member of  
parliament for Medicine Hat con-  
stituency, has been appointed chair-  
man of the Ontario Hydro-electric  
commission to succeed the late Sir  
Adam Beck. Mr. Magrath is an  
old-time resident of Lethbridge,  
Alberta.

### Big Sheep Deal

A big sheep deal was arranged at  
Cardston last week between James  
Nielson, one of Southern Alberta's  
foremost sheepmen for years, and  
W. E. Pitcher, prominent farmer  
and machinery dealer of Cardston.  
Mr. Pitcher purchased the entire  
flock of sheep and also the big lease  
on the Blood Indian Reserve from  
Mr. Nielson. The deal involved  
\$58,000.

### New Salt Industry

What is destined to become one  
of Alberta's most important indus-  
tries, and what is practically the  
first industry of consequence to be  
developed in territory tributary to  
the A. and G. W. line, is now in full  
swing. This is the salt plant of the  
Alberta Salt Co. at Port McMurray  
which is financed by Edmonton men.

The plant, which has been under  
construction for the past year or  
more at the salt wells on the Atha-  
basca river just above Fort McMur-  
ray, has been in operation for some  
weeks, and is producing about 40  
tons of salt a day, it is stated. It is  
hoped later on to be able to increase  
the capacity of the plant to about  
75 tons per day.

The salt produced at the plant is  
finding a ready sale, which is evi-  
denced by the fact that the firm had  
orders for 20 carloads during the  
past week.

The yearly consumption of salt in  
Alberta is estimated at about sixty  
thousand tons, and it is stated that  
it would be possible to fill all of this  
demand in the near future from the  
new plant at McMurray. This, in  
combination with the going traffic  
incident thereto, would mean valu-  
able traffic for the government rail-  
way, the A. and G. W. Even as it  
is at present, the operation of the  
plant is adding welcome traffic to  
the government road.

### Co-operative Loans in Good Shape

That practically every cent of  
money loaned by the provincial  
government to the sugar beet growers  
of the southern Alberta irrigation  
districts under the Co-operative  
Credit Societies' Act this spring will  
be repaid when the returns from the  
present harvest are in, is the  
opinion of W. V. Newson, deputy  
provincial treasurer, who has com-  
pleted an inspection trip of the sugar  
beet district.

Approximately \$100,000 has been  
loaned sugar beet and other societies  
connected with that industry.

Mr. Newson, during his inspec-  
tion of the sugar beet districts, in  
connection with the loans to the  
credit societies, found that a more  
than usually good crop is being ex-  
pected. Harvesting is starting very  
shortly and an average of 16 tons to  
the acre of beets is anticipated. Mr.  
Newson saw some fields which will  
go much higher, even as high as 25  
tons to the acre.

The ordinary profit figured on an  
acre of beets yielding 16 tons is from  
\$40 to \$50, but in some cases this  
profit will go as high as \$70 an acre.

Tribute to the operation of the  
Co-operation Credits Act in this  
province is paid by W. H. Wattie,  
president of the Utah Idaho Sugar  
Co. and the Canadian Sugar Fac-  
tories, Ltd., which is operating the  
factory at Raymond. Mr. Wattie is  
immensely taken with the success-  
ful operation of this act in Alberta,  
particularly in respect to the sugar  
beet industry, and takes occasion,  
in a letter to Mr. Newson, to give  
unintended praise for the act itself,  
and its administration by the pro-  
vincial treasury department. In-  
cluding beet societies and others now  
in operation, there are 32 societies  
in all. The total amount loaned to  
all societies in 1924 was \$944,581.61.  
The total amount of loans outstanding  
at the end of December 1924,  
was \$56,009.01. Of this amount  
it is expected that only \$35,000  
will be carried over at the end of  
the year.

Mr. Newson states that in the total  
experience of the department over a  
period of seven years the total of  
bad debts accumulated will not ex-  
ceed \$25,000, which may easily be  
written off out of reserves.

### Senior Grades Examination September 18th.

The following are marks obtained by

# Ten Thousand Alberta Farmers WITH ONE MILLION ACRES OF WHEAT

Are Now Ready to Join the Wheat Pool

A Commission of \$1.50 per Contract  
will be paid on all bona fide Contracts  
sent to Head Office

BETWEEN SEPTEMBER 28th and  
DECEMBER 31st, 1925.

The Campaign is open to the public and a com-  
mission will be paid to all Canvassers except members  
of the Board of Directors and Employees of the  
Pool.

Delegates and Local Secretaries are eligible to  
canvass and to receive commission.

## CONDITIONS OF CAMPAIGN

- (1) All contracts sent in must be complete as to signa-  
ture of the grower, his Post Office address, land  
location, etc. If the growers name is not clearly  
written, print it.
- (2) A Canvasser's Report properly filled in must accom-  
pany each parcel of Contracts. This will show to  
whom the Commission should be paid.
- (3) Where the membership fee of \$3.00 is paid in cash  
by the signer, the canvasser may remit \$1.50 to  
the Head Office and retain the balance as his  
commission.
- (4) Where the grower signs the note for \$3.00, the can-  
vasser should see that the signature is properly  
witnessed. A commission of \$1.50 per contract will  
be mailed to the canvasser's address as shown on  
the canvasser's report accompanying the Contract.
- (5) Contract forms, Canvasser's Report forms, and  
self addressed envelopes, are being sent to all Wheat  
Pool Delegates, Wheat Pool Local Secretaries, U.F.A.  
Secretaries, and Secretaries of Municipal Districts,  
or you can write to Head Office for supplies.

Increase Your Selling Strength  
By an Additional Ten Million  
Bushels in This Year's Pool.

BOARD OF DIRECTORS,  
Alberta Co-Operative Wheat  
Producers Limited, Calgary.

BOWELS.

## BARRE, SON OF KAZAN

by  
**James Oliver Curwood**

### A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.  
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog,  
is an Adaptation of This Story

#### SYNOPSIS

Barre, the young wolf-dog, wandering in the wilderness came upon a colony of beavers. He tried to make friends with Unlak, their leader, but the little animals ran away from him, leaving Barre lonely and unhappy. He was attracted by the moaning of the moon and the yap-yap of a fox, but he thrilled most at the wolf cry. It was the call of his own, summoning him to the chase, the hunt, the glory of torn flesh and running blood.

#### CHAPTER VII.—Continued.

For a quarter of an hour Barre watched him while he knelted him out of the pool. When at last he stopped, there were twenty or thirty fish among the stones, some of them dead and others still flopping. From where he lay flattened-out between the two rocks, Barre could hear the crunching of flesh and bones as the bear devoured his dinner. It sounded good, and the fresh smell of fish filled him with a craving that had never been roused by crayfish or even partridge.

Twenty seconds after the last of Wakayoo had disappeared in a turn of the creek, Barre was under the broken balsam. He dragged out a fish that was still alive. He ate the whole of it, and it was delicious.

Barre now found that Wakayoo had solved the food problem for him, and this day he did not return to the beaver pond, nor the next. The big bear was incessantly fishing up and down the creek, and day after day Barre continued his feast.

For a week life continued to be exceedingly pleasant. And then came the break—the change that was destined to mean as much for Barre as that other day, long ago, had meant for Kazan, his father, when he killed the man-brute in the edge of the wilderness.

This change came on the day when, in trotting around a great rock near the waterfall, Barre found himself face to face with Pierrot, the hunter, and Nepeese, the star-eyed girl who had shot him in the edge of the clearing.

It was Nepeese whom he saw first. If it had been Pierrot he now

#### Want Canadian Governor-General

Vancouver Native Sons of Canada Favor Canadian for Post.  
The Vancouver Assembly, Native Sons of Canada, went on record as favoring the appointment of a Canadian to the office of governor-general. Sir James Almon, Sir Robert Borden, Sir William Mulock, Hon. Rudolph Lemieux, Sir Arthur Currie, Sir Lomer Gouin, and Sir Hon. W. S. Fielding, were suggested as suitable for the position.

#### Cuticura Baths Comfort Baby's Skin

The absolute purity and delicate medication of Cuticura Soap make it ideal for baby's tender skin. Used daily with touchings of Ointment to little skin troubles, it keeps the skin smooth, clear and healthy. Cuticura Talcum is soothing and cooling, ideal for baby after a bath.

Sample Box Free by Mail. Address: Cuticura Remedies, P.O. Box 102, Lowell, Mass., U.S.A. Cuticura Soap, 25c. Cuticura Ointment, 25c. Cuticura Talcum, 25c.

turned back quickly. But again the blood of his forebear was rousing strange treachings within him. Was it like this that the first woman had looked to Kazan?

Barre stood still. Nepeese was not more than twenty feet from him. She sat on a rock, full in the early morning sun, and was brushing out her wonderful hair. Her lips parted. Her eyes shone in an instant like stars. One hand remained poised, weighted with the jet tresses. She recognized him, that saw the white line on his breast and the white tip on his ear, and under her breath she whispered "Uch! moosa!"—"The dog-pup!" It was the wild dog she had shot—and thought had died!

The evening before Pierrot and Nepeese had built a shelter of balsams behind the big rock, and on a small white plot of sand Pierrot was kneeling over a fire preparing breakfast while the Willow smoked her hair. He raised his head to speak to her, and saw Barre. In that instant the spell was broken. Doree saw the man-beast as he rose to his feet. Like a shot he was gone.

"Nepeese was not more than twenty feet from him."

Scarcely swifter was he than Nepeese. "Nepeese was, non pere!" she cried. "It is the dog-pup! Quick!" In the floating cloud of her hair she sped after Barre like the wind. Pierrot followed, and in going he caught up his rifle. It was difficult for him to catch up with the Willow. She was like a wild spirit, her little nose gained feet scarcely touching the sand as she ran up the long bar. It was wonderful to see the little swiftness of her, and that wonderful hair streaming out in the sun. In this moment of excitement, it was Pierrot thought of McTaggart, the Hudson Bay Company factor over at Lac Bain, and what he had said yesterday. "Half the night Pierrot had been awake, grinding his teeth at the thought of it and this morning, before Barre ran upon them, he had looked at Nepeese more closely than ever before in his life. She was beautiful. She was lovely even that Wylra, her princess mother, who was dead.

Floating back to him there came an excited cry.

"Hurry, Neotawe! He had turned into the blind canyon. He cannot escape us now."

She was panting when he came up to her. The French blood in her flowed a vivid crimson in her cheeks and lips. Her white teeth gleamed like milk.

"In there!" And she pointed.

They went in.

Ahead of them Barre was running

for his life. He sensed instinctively by the fact that those wonderful two-legged beings he had looked upon were all powerful. And they were after him! He could hear them. Nepeese was following almost as swiftly as he could run. Suddenly he turned into a cleft between two great rocks. Twenty feet in, his way was barred, and he ran back. When he darted out, straight up the canyon, Nepeese was not a dozen yards behind him, and he saw Pierrot almost at her side. The Willow gave a cry.

"Mans—mans—there he is!" She caught her breath, and darted into a cove of young balsams where Barre had disappeared. Like a great entangling web her loose hair impeded her in the brush, and was an encouraging cry to Pierrot the stopped to gather it over her shoulder as he ran past her. She lost only a moment or two, and was after him. Fifty yards ahead of her Pierrot gave a warning shout. Barre had turned. Almost in the same breath he was tearing over his back-trail, directly toward the Willow. He did not see her in time to stop or swerve aside, and Nepeese flung herself down in his path.

For an instant or two they were together. Barre felt the smother of her hair, and the clutch of her hands. Then he squirmed away and darted again toward the blind end of the canyon.

Nepeese sprang to her feet. She was panting—and laughing. Pierrot came back wildly, and the Willow pointed beyond him.

"I had him—and he didn't bite!" she said, brushing swiftly. She still pointed to the end of the canyon, and she said again: "I had him—and he didn't bite me, Neotawe!"

That was the wonder of it. She had been reckless—and Barre had not bitten her! It was then, when her eyes shined at Pierrot, and the smile flashed from her lips, that she spoke softly the word "Barre," which in her tongue meant "the wild dog"—a little brother of the wolf.

In and out among the rocks Barre sought swiftly for a way of escape. In a moment more he had come to the "box," or cup of the canyon. This was a break in the wall, fifty or sixty feet wide, which opened into a narrow prison about an acre in extent. It was a beautiful spot. On all sides but that leading into the cul-de-sac was shut in by walls of rock. At the far end a waterfall broke down in a series of thrilling cascades. The grass was thick underfoot, and strewn with flowers. In this trap Pierrot had got more than one fine haunch of venison. From it there was no escape, except in the face of his rifle. He called to Nepeese as he saw Barre entering it, and together they climbed the slope.

Barre had almost reached the edge of the little prison-meadow when suddenly he stopped himself so quickly that he fell back on his haunches, and his heart jumped up into his throat.

HUNTERS!  
Take a bottle of Minard's to the woods with you. It's good for sprains, cuts, bruises.

MINARD'S  
"KING OF PAIN"  
LINIMENT

If angola fear to tread where foot

rush in, they might use their wings.

Full in his path stood Wakayoo, the huge black bear! Barre darted to one side and ran for the open meadow. Wakayoo did not stir as Barre sped past him—no more than if he had been a bird or rabbit. Then came another breath of air, heavy with the scent of man. This, at last, put life into him. He turned and began lumbering after Barre into the meadow trap. Barre, looking back, saw him coming—and thought it was pursuit. Nepeese and Pierrot came over the slope, and at the same instant they saw both Wakayoo and Barre.

Where they entered into the grassy dip under the rock walls, Barre turned sharply to the right. There was a great boulder, one end of it tilted up off the earth. It looked like a splendid hiding place, and Barre crawled under it.

But Wakayoo kept straight ahead into the meadow.

(To be continued)

#### A Canadian Explorer

##### Major Burwash Starts On a Long Patrol of Northern Points in Canada

When Amundsen made his spectacular flight to the North Pole—or to some point in its vicinity—the whole world was interested. When the McMillan expedition, thoroughly outfitted and equipped in every way for its work of Arctic exploration, set out, every item of news about the trip is featured in the press of the world.

Less is heard about the trip a Canadian is making into the far north. The Canadian public, by the Interior department at Ottawa, gives some particulars about the little advertised adventure on which Major L. T. Burwash, of the government service, has embarked. Major Burwash has started on a long patrol from the mouth of the Mackenzie River to Hudson's Bay. He goes alone on his two legs, expects to be two years on the journey, and to live with the Eskimo he encounters on the way. He will study the country, estimate the population, make astronomical and meteorological observations, and take notes on bird, animal and floral life. He expects at the end of two years to come out either at Repulse Bay or Chesterfield Inlet, as convenience at the end of the trip may determine.

There is no great publicity about such an adventure as that of Major Burwash. Nor is it unusual for men in the Canadian service to make these long and arduous northern journeys. Men of the department of the interior are forever doing it, as are men of the Mounted Police. There is scarcely an annual report of the Mounted Police issued that does not contain a brief but graphic report of a trip covering long months and thousands of miles on foot, by canoe, dog-sled and snowshoes. These trips are often made by men of action, not writers, or some wonderful books of travel would appear—Regina Leader.

#### London Zoo Loses Old Exhibit

##### White Bear Has Been Entertaining Feature For 22 Years

Sam, the great white bear which has been one of the most entertaining features of the London zoo for 22 years, was recently sentenced to die a military death and was formally shot. For six months he steadfastly refused to take a bath, although, when in his prime, scrupulous attention to his appearance was one of his many pleasing characteristics.

The reason for Sam's loss of interest in life is domestic. For 19 of his 24 years he was the suspected husband of a wife even more famous than himself. She died and efforts to find Sam a new wife failed.

Lizzie, three years old and decidedly flapper in her ways, was introduced, but Sam resisted all her charms, treating her with rude coolness until one day Lizzie angered him beyond endurance and he ducked her in the pool and sat on her head. That ended Lizzie's career as Sam's wife, and nearly ended Lizzie's life.

Fine Record of Imperial Airways Britain's air transportation company, The Imperial Airways, which came into existence May, 1924, recently completed 1,000,000 miles of flying. During the past 12 months aeroplanes carrying 102,000,000 worth of billion, 15,000 passengers and 1,000 tons, of freight have flown across the channel at 100 miles an hour.

If angola fear to tread where foot

rush in, they might use their wings.

## WRIGLEYS AFTER EVERY MEAL

affords benefit as well as pleasure.  
Healthful exercise for the teeth and a spur to digestion. A long-lasting refreshment, soothing to nerves and stomach.  
The World Famous Sweetest, untouched by hands, full of flavor.  
SEALED TIGHT KEPT RIGHT

#### English Oaks Becoming Rare

##### Not Good For Use Until Tree is 400 Years Old

England's famed oaks are disappearing. Many oaks were cut down during the war, as the wood was urgently needed. Said a botanist, "The wood of an oak is not really any good until the tree is 400 years old, and people today cannot afford to grow oaks patiently. Originally large parts of England were covered with oaks. The tree is almost a rarity now in some places. It is said that an oak takes 400 years to grow to full size, is mature for another 400 years, and takes 400 years more to decay. In some cases I should say this is true."

#### KEEP BABY WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Respect For Law  
If Chicago has thirteen times as many murders as all Canada she cannot plead the "new country" excuse. The fact is that English law and the spirit of English law administrators work wonderfully in the newest countries on earth.—Brooklyn Eagle.

**For Quick Hot Water**

Fill an SMP Enamelled Tea Kettle. Set it on the stove. No Kettle will boil water quicker. That means convenience, time saved, too. All SMP Enamelled Teas are very fast coming to the boil and in their job of cooking. Not only quicker to cook with, but easier, more quickly cleaned after. The best way you look at it. Think this over.

**SMP Enamelled TEA KETTLES Save Fuel**

## COULD NOT SLEEP NIGHTS

### Pains and Headaches Relieved by Taking Lydia E. Pinkham's Vegetable Compound

Dublin, Ontario.—"I was weak and irregular, with pains and headaches, and could not sleep nights. I learned about Lydia E. Pinkham's Vegetable Compound by reading the letters in the newspapers, and tried it because I wanted to get better. I have got good results from it as I feel a lot stronger and am not troubled with such bad headaches as I used to be and am more regular. I am gaining weight all the time and I tell my friends what kind of medicine I am taking. You may use my letter as a help to others." Mrs. James MacCubbin, Box 12, Dublin, Ontario.

Halifax Nurse Recommends  
Halifax, N. S.—"I am a mother nurse and have recommended Lydia E. Pinkham's Vegetable Compound to many women who were children to women who need a good tonic. I am English and my husband is American, and he told me of Lydia E. Pinkham while in England. I would appreciate a copy or two of your little books on women's ailments. I have one which I keep to lend. I will willingly answer and answer any woman taking the Vegetable Compound."—Mrs. S. M. CORSEMAN, 24 Uniacke Street, Halifax, Nova Scotia.

## NO PLAN WAS MADE TO FORM WESTERN PARTY

Winnipeg.—"Nothing was ever said or suggested by me at the inter-provincial Progressive convention at Regina, or, for that matter, at any other time or place, making a plea for union of Liberal and Progressive forces in the west," said Hon. T. A. Corcoran, when interviewed in connection with a story published here. Knowledge of a move to form any such coalition was also denied by Robert Forke, Progressive leader, and Hon. A. B. Hudson, South Winnipeg member.

"You may say for me," he said, "that I never heard anything about such a move. When the report credits me with having made a speech at the Regina convention putting forward an ardent plea for union of Progressive and Liberal forces in the west, with the object of making a coalition, if possible, defeat of the Conservatives, it is absolutely and positively untrue. Far from ever making such a statement, I never even suggested it, directly or indirectly."

"It's a piece of news to me," said Mr. Forke, over the long distance phone. "So far as the Progressives are concerned, no such move has been made. We would have nothing to do with any such union."

Hon. Mr. Hudson said no one had ever asked his opinion on such a question, and no such idea had ever been suggested to him.

## British Wait Decision On Mosul Boundary

Secretary of Foreign Affairs Says Question Contains War Menace  
London.—Austen Chamberlain, British secretary of foreign affairs, has gone to Geneva to attend to the League of Nations council assembly, which is faced with two principal problems—the Mosul question and European security.

The league's decision on the report of the Mosul boundary commission is awaited with keen interest in official British circles. The London Star, an evening newspaper, warns of the danger of war over Mosul if the Turks decide to fight Great Britain for possession of Mosul Vilayet, but well-informed circles believe this view to be unfounded and expect a satisfactory settlement at Geneva.

## Rome Is Insolvent

Once Ruled World, Cannot Pay Costs Of Administration Now  
Rome.—The Eternal City, which for centuries ruled the world, now even loses its rights to city administration. Its insolvent financial condition compelled the government to take action and the cabinet decided to adopt the plan, so the taxpayers throughout the country would contribute to the support of the capital. Although taxes in Rome have been higher than in any city in Italy, it has been unable to pay the costs of administration. The administration is now under the minister of the interior, who appoints a governor.

"Dud" Kills French Farmer  
Amiens, France.—The "Dud" of the Great War still remains a deadly missile. Jean Roy, a farmer of Bonchavonne, which was under heavy fire by the German guns during the period of hostilities, was blown to pieces by a shell which had fallen without exploding and was buried in the earth. He struck it while driving a stake into the ground.

Investigating Canton Embargo  
Vancouver.—The Canton embargo against British vessels is receiving the serious attention of the British and Canadian Governments and other governments affected, according to a telegram received by the Vancouver Merchants' Exchange and the board of trade, from Light Hon. W. L. Mackenzie King, in reply to messages sent to the premier on August 20.

Manitoba Gold Discovery  
Winnipeg.—An immense vein of free-milling gold quartz has been discovered in the vicinity of Hole River, Man., about 100 miles from here, according to Lester Stenice, miner and prospector, who has arrived here.

## Favor Ban On Narcotics

Trades and Labor Council Would Prohibit Manufacture Except For Medicine

Ottawa.—The trades and labor congress went on record favoring the complete prohibition of the sale and manufacture of narcotic drugs except for medical purposes.

The motion was the occasion for a brief criticism of the British Government. T. Buck, of Toronto, declared that the British Government was largely responsible for the opium traffic of the world today because of its fostering of the industry in India and should be subject to severe censure.

James MacDonald, Toronto, said if one country more than another was responsible for the opium trade, it was the British empire. There was no such thing as a British commonwealth of nations, he said.

Bert Merson, Toronto, declared that the British empire alone was not responsible and the immediate and speedy suppression of the industry would cause Germany and other countries to commence the manufacture of deadly substitutes. Britain was open to criticism as were other nations, and the congress should be on record as opposed to the traffic, which was one of the greatest menaces to public health.

## Extend Letter Rate To Wider Area

Additional Countries Are Included In Three Cent Postage

Moose Jaw.—The post office weekly bulletin issued from Ottawa on August 20, gives the following information relative to letter postage to North American continent: From the first of September next the domestic letter rate of three cents for the first ounce and two cents additional for each subsequent ounce will be in effect as regards letters mailed in Canada to any part of the North American continent.

This rate already applies to letters for the United States, Mexico and the British West Indies, and as already announced, also comes into effect as regards letters for Newfoundland from the first of September. With the further extension mentioned above, it will apply from the first of September next to the following additional countries: Costa Rica, Cuba, Dominican Republic, Dutch West Indies (Aruba, Bonaire, Curacao, Saba, St. Eustatius, St. Martin), French West Indies (Martinique, Guadeloupe), Guatemala, Haiti, Honduras Republic, Nicaragua, Panama Republic, Salvador and St. Pierre and Miquelon.

Would Join Germany  
Vienna.—Three thousand persons attended a meeting in the city hall to express a desire in favor of Austria being attached to Germany. President Loeb, of the Reichstag, recently came from Germany with a committee of German destroyers of the union of the two countries.

British Teachers Tour Canada  
Toronto.—Sixty-five education authorities and members of the teaching profession from the public and secondary schools of Great Britain, who are touring the Dominion under the auspices of the Overseas Education League, have reached here.

Returns to United States  
Calgary.—William Sherman, president of District 10 of the United Mine Workers of America, has resigned and is returning to the United States. Sherman succeeded his father, F. H. Sherman, in the position four years ago.

Darrow Through With Law  
Girard, Kas.—Clarence Darrow, here to discuss publication of his book with E. H. Henson-John, asserted today he is through with the practice of law and that he looks forward to work as a writer.

Women Want Housewives  
Edmonton, Alta.—A noticeable feature in the mail received by the local office of Dominion lands is the number of women directing inquiries as to available housewife land.

Settle Claims With Mexico  
Mexico, City.—The foreign office announces that Britain has accepted an invitation extended by Mexico to appoint a claims commission to settle the claims of the respective countries.

## At Imperial Press Conference

J. H. Woods, Editor and Managing Director of The Calgary Daily Herald.

## Imperial Press Conference

Delegates Welcomed to Australia By Premier Bruce

Sydney, Australia.—The Empire Press delegates to the Imperial Press conference at Melbourne, who visited New Zealand on their way to Australia, arrived here after a somewhat stormy voyage from New Zealand. They were welcomed by Premier Bruce of the Australian Commonwealth.

Premier Bruce described the coming Imperial Press conference as the unofficial parliament of the British commonwealth of nations.

"The fuller knowledge resulting from the interchange of ideas," Premier Bruce said, with reference to the press conference, "will enable the conference to make a valuable contribution to the solution of empire problems. The delegates have at their responsible command potent instruments for moulding and directing public opinion, and have as an audience the whole people of the empire."

## Want Full Civil Rights

Edmonton.—Full civil and political rights, as enjoyed by other civilians, as well as the abolition of monetary fines for mistakes made by civil servants, were demanded in a number of resolutions passed at the annual convention of the Amalgamated Civil Servants of Canada.

## Ship Horses To Germany

Trial Shipment of Western Horses for New Market

Moose Jaw.—With a view to finding a suitable market for the light horses of the Canadian west, Jack Byers, Dominion livestock representative in the west, will accompany a shipment of 81 head of western bred horses to Germany.

This shipment which has been assembled in Moose Jaw stockyards, will leave for Boston shortly and will be shipped direct to Hamburg, Germany. The shipment was purchased from the ranchers of Saskatchewan and Alberta by Jack Byers, assisted by Dr. McClellan, Regina, provincial veterinarian, and Dr. Talbot, Edmonton, provincial veterinarian for Alberta.

This is a trial shipment and the results of the experiment will be watched with interest by Western Canadian ranchers.

## King Tut Again

Body of Famous Egyptian King to be Exhumed in October

London.—Howard H. Carter, discoverer of Tutankhamen's tomb, announced that the body of the king would be exhumed next October. He said, he believed King Tut will be found to have been only 15 or 16 years old. The body will be examined without removing it from the tomb and at a time when there is no curious crowd.

Carter added that he found cosmetics still plastic and fragrant in a cosmetic jar in the tomb, and experts in London are analyzing them with the hope of producing for modern women cosmetics like those used by Egyptians 3,500 years ago.

## Treaty With Japan

States Japan Ready For Trade Pact

Victoria.—Bringing with him the information that the Japanese people would welcome a separate reciprocity treaty with Canada, Hon. T. Kawai, new Japanese consul for Western Canada, arrived here on the liner Alabama Maru.

Mr. Kawai said that while Canada had adopted the principles of the Anglo-Japanese treaty, which was ratified only by Great Britain, and not by her dominions, no direct trade treaty existed between Canada and Japan.

## Ancient Escutcheon Back In Quebec

Hon. P. C. Larkin Brings Relic Returned By People Of Hastings, England

The arrival of the White Star-Dominion liner, Megantic, which docked at Quebec recently, marked an important event in the history of the city, inasmuch as she carried among her passengers the Hon. P. C. Larkin, Canadian high commissioner in London, who brought back to this country the ancient escutcheon of King Louis XV, of France. No public ceremony was held, this having been postponed until September 10, to enable many prominent citizens, now away from their home, to attend.

The historic shield was removed from one of the gates of Quebec in 1759, after the capture of that city by Wolfe, and was taken to England by General Murray. Since that time, the relic of the French regime has been in the possession of the city of Hastings, England, and some time ago negotiations were started with a view to its restoration which resulted in its return.

## MINE WORKERS ARE ASSAILED BY EMPLOYERS

Philadelphia.—Anthracite operators emphasized "the need to insist that a softening of the suspension shall include measures in avoiding future strikes."

W. W. Inglis, in a statement to this effect, which he made public in Scranton, as chairman of the anthracite operators' scale committee, assailed the action of the mine workers in stopping work because no contract had been negotiated to replace the one which expired.

The following are some facts about the big anthracite strike:  
Workers involved, 165,000.  
Collieries affected, 272, serving 825 mines.

Companies involved, 135, of which nine control 135 of the largest collieries.

Area affected, 10 counties in North-eastern Pennsylvania covering 500 square miles, practically the only commercial anthracite in the United States.

Maintenance men remaining on duty to preserve property, 5,000 to 10,000.  
Loss in wages per day, \$1,150,000.  
Loss in daily production, 266,000 tons.

Cause of suspension: Expiration of two-year contract August 31, 1925, and failure to reach new agreement.  
Demands of union miners: 10 per cent. increase in tonnage rates; \$1 a day additional for day men; check-off equalization of day rates; two-year contract, and other features.

Reply of operators: Would not consider demands that increased cost of mining, and suggested that differences be arbitrated.

## Bank Merger Consummated

Five Union Bank Directors Added to Royal Bank Board

Montreal.—In accordance with the agreement sanctioned by the finance minister, the Royal Bank of Canada, at the close of its business on Aug. 31, took over the business and assets of the Union Bank of Canada.

The following directors of the Union Bank have been added to the board of the Royal Bank: W. R. Allan and R. E. Riley, of Winnipeg; Stephen Hays, of Toronto; John H. Price, of Quebec; and W. H. Malkin, of Vancouver.

J. W. Hamilton, former general manager of the Union Bank, has been appointed assistant general manager of the Royal Bank, with headquarters at Winnipeg.

On June 30, the latest date for which returns are available, the principal figures of the combined banks were as follows: Capital and reserve, \$48,380,000; deposits, \$522,526,440; commercial loans, \$322,487,330; total assets, \$731,776,737. The business of the two banks has been consolidated at 47 points where both banks were represented.

The Royal Bank of Canada will now have 789 branches in Canada and 126 abroad.

Western Stock For Toronto Fair  
Moose Jaw.—Glechrist Bros., ranchers of Maple Creek, have sold 25 head of two-year-old feeder steers of Hereford strain, which will be exhibited at the Canadian National exhibition at Toronto to demonstrate to the eastern feeders the quality of the stock raised in Saskatchewan. The purchase was made by Jack Byers, Dominion livestock representative.

New Oil Developments  
Lethbridge, Alta.—Important developments are pending in the border oil fields, where the Imperial Oil Company's Dead Horse Creek well, half a mile from the Rogers Imperial gas giant, 20 miles east of Coutts, has oil at 2,630 feet.

Will Go To McGill  
Montreal.—The following are among those appointed as demonstrators in the department of chemistry, McGill University: D. S. Pasternack, B.Sc., Calgary; B. P. Sutherland, B.Sc., Vancouver; and C. R. West, B.Sc., Seattle.

Demand For Labor  
Ottawa.—There is a big demand for outside labor, the government employment bureau announces. Fully 1,000 business and 100 farm hands are needed.

# Build Giant Airplanes To Carry Passengers Across Atlantic Is Dream Of Aircraft Expert

The scheme to build giant aeroplanes capable of crossing the Atlantic, with an estimated passenger list of one hundred and fifty voyagers, besides the weight of engines, fuel and crew, is the grand dream of Mr. Jose Navarro, whose experience as aircraft expert entitles his proposal to respectful attention. That it comes within the compass of up-to-date aerial aviation is shown by the remarkable flight of Drouhin and Landry, the French aviators who recently stayed aloft more than forty-five hours and covered a distance of four thousand kilometres, enough to forebode the possibility of traversing by plane the big pond in the regular way of traffic. Such an achievement, says the Minneapolis Journal, would be simply an extension of what is being done every day in Europe and the United States. Improvements of late years made in the speed, equipment and safety devices of aerial ships indicate that the day is not far distant when all the mail belonging to floating airplanes will be absorbed by flying ships. The latter, as sketched out and furnished with nine Napier Lion engines of four hundred and fifty horsepower each, should be able to navigate the route, and Mr. Navarro is confident that they will.

An estimated wing-spread of one hundred and eighty-five feet from tip to tip presents the vision of an awesome condenser of the way through cloudland, so that the problem of finding and providing suitable landing places is probably greater than getting into the air or proper storage facing all weather of these high altitudes. But each year brings forth new inventions making for assured comfort, and more devices for safety resort in case of any partial breakdown of the machinery. The giant planes are designed to carry collapsible boats and lifeboats in case they should descend upon the water; and it is noticeable that as aeroplane construction develops, better means are forthcoming to make an up-line start and smoother finish of the voyage.

Aircraft structure and pilotage is still in its infancy. Considering that it is less than twenty years ago since Santos Dumont made a distance record of two hundred and twenty metres in twenty-five seconds, it will be seen that an amazing advance has been already made, and had the French aviators referred to flown in a bee-line instead of in circles they would have crossed the Atlantic without pause. Much still remains to be done by way of reducing the wing-spread constant with the maintenance and increase of power, and to this purpose aerial experts are addressing themselves with considerable success. Professor Low thinks that there is urgent need that some method of silencing, or at least muting, the noise made by aeroplanes and propellers should be discovered. In time this may also be attained. Yet already the passengers who embark in a modern plane can be sure of comfortable and even luxurious quarters aboard the wheeled hotel, and all signs predict that ere many years have passed it will be possible to book from London to New York, or by any other route established for a thirty-five hour flight, with no greater risks than are encountered in any other mode of travel. Just now the chief concern that Mr. Navarro has in mind is the financing of the new venture.

## A Plucky Canadian

Patrick Mongoon, a Canadian, joked and smoked for three-quarters of an hour with attempts were made to relieve his foot, which was caught between two cars on the Hudson-Manhattan tube. The foot had to be amputated. No anaesthetic was used, and Mongoon remained cheerful during the operation.

## Output Of Silver

The output of silver from Cobalt during July amounted to about 400,000 ounces, according to preliminary estimates. This had a value of less than \$280,000, or at the rate of about \$2.50,000 a year. Nipissing was the heaviest producer, followed in turn by Oldham, Mining Company, McIntyre, Dargatz, La Ronge and Menegay.

W. N. U. 1699

# The Advantages Of Egg Grading

Canada's System Is Claimed to be the Best in the World

Canada was the first country to grade and standardize eggs. Thirty-one inspectors are now employed throughout the country by the Dominion department of agriculture, checking up on export and interprovincial shipments and on the wholesale and retail trade. Eggs for human consumption are divided into four grades on the basis of interior quality, cleanliness and weight. Our system of egg grading is claimed to be the best in the world and has been adopted with slight modification by the United States. This standardization of eggs has established confidence between producer and consumer and between exporter and British importer, and has resulted in a greatly increased demand for the Canadian egg both at home and abroad. Our domestic consumption per capita has increased from 16.75 dozen in 1920 to 26 dozen in 1924. The Canadian people are now approaching a consumption of an egg per person per day and when this is reached we shall require about 270 million dozens to supply our wants.

## Experimenting With New Cereal

Adlay Is First Grain To Be Discovered For Centuries

Experts are interested in experiments that are being made in the Philippines with a new cereal called adlay. At one time or another all cereals, such as wheat, rice and maize, were wild grasses, and many years of patient research have been necessary to develop the cereal utility. There to be numerous grains of potential value growing throughout the world, but until the discovery of adlay no adlay has been made to our existing supplies for centuries. Adlay has been known in the East for some time. The natives have made use of it in its half-wild state, but no effort was made towards its cultivation and development. There came a day, however, when somebody discovered that the grain contains as much protein as wheat, and at least three times as much fat. Experiments have proved that adlay is more productive, more feeding and more palatable than the majority of existing cereals.

## Basis Of All Prosperity

Says Agriculture The Most Solid Asset Of Canada

"Agriculture is the basis of all prosperity and no matter how serious is the crisis that affects farmers today, and in spite of the fact that your city is passing through a period of industrial prosperity never before seen, I have no hesitation in saying that there is more money among your labor population than among any group of farmers in this province," said Hon. J. E. Carson, minister of agriculture in the Quebec Government, at the luncheon of the Three Rivers exhibition. The minister of agriculture was emphatic in his statement that agriculture is the most solid asset of Canada and he denounced its derogatory terms those who are discouraging the agricultural class.

## Not Working To Capacity

Hens Not Doing Their Best Says Secretary of English Poultry Club

Scientists have done a great deal in improving the egg-laying capacity of the English hen. It was pointed out recently by Sir Francis Floud, secretary of the English Poultry Club, who contended, however, that the egg producers were not doing nearly as much work as they should in these days of progress.

Sir Francis said that in 1908 the average output per hen was 72 eggs per year. In 1924 it was 100, but ought to have been 120, which would have increased the wealth of the country considerably.

## Too Much For One

A farmer found one too heavy for the donkey to pull up a steep hill. A passing tourist came to the rescue, and helped to drag the vehicle. The farmer, full of gratitude, turned to the obliging pedestrian and, thanking him, added: "I never could have done it with one ass."

Samson claims, after a visit to New Zealand, declared that they wished the British flag might run to the "Pamers" as long as the sun shines on the earth.

# The Great Importance Of a Pure Water Supply For The Rural Districts Should Be Stressed

## Winter Feeding For Egg Laying

Testing Various Feeds and Their Effect Upon Egg Production

In the report of the Dominion poultry husbandman for 1924 half a dozen pages or more are devoted to particulars of a series of experiments conducted during the winter of 1923-24 to test various feeds and their effect upon egg production and hatchability. Such minute details are given that they are far better studied than summarized. Indeed a mere summary could in no way do justice to the mass of facts supplied, not only as to results but as to cost. With the exception of the popular feeds under experiment all pens were handled and fed alike. The scratch grain was a commercial mixture, the mash being the standard home-made mash consisting of equal parts by weight of bran, shorts, cornmeal, ground oats and beef meal. This mash was fed to all pens except those in which protein feeds were under test. Grain, shell and charcoal were kept before the birds in hoppers at all times. Unless otherwise indicated they were also given both milk and water to drink.

The various experiments of which full and clear tables of results are given are as follows: (1) Barley vs. tankage vs. liver tankage vs. raw liver; (2) animal protein experiment with hatching results; (3) Mangel vs. sprouted oats vs. clover leaves vs. cabbage vs. Epsom salts vs. no green feed. Tabulated summaries are also given in the report, which can be had without cost on addressing the publications branch, Ottawa, of two years' experience with green leaves and substitutes of a green feed experiment with hatching results of a clover, clover meal, alfalfa-meal and tomato pulp experiment with hatching results.

## Exports Of Dairy Products

Export Trade Shows Signs of Healthy Revival

Canada's export business in dairy products for the twelve months ending with June of the present year showed very considerable improvement over that of the preceding year. As reported in the last News Letter of the Dominion dairy and cold storage branch the exports of butter in 1924-25 were 25,096,120 lbs. valued at \$5,347,984 and of cheese 134,418,700 lbs. valued at \$15,742,322 compared with in 1923-24, 15,668,379 lbs. of butter valued at \$5,031,634 and 112,603,106 lbs. of cheese worth \$12,634,380. The exports were, of course, mostly to the United Kingdom, but it is noticeable that in June alone China took 57,222 lbs. of butter, and Belgium 171,100 lbs. and Germany 168,500 lbs. of cheese. Altogether some thirty different countries or colonies shared in our exports of dairy products.

## Immigrants From Britain

10,600 Women Move From Britain to Canada in Year

According to official figures just made public, 10,600 females—wives and housekeepers—left the British Isles for British North America last year, and 6,000 went to Australia. More than 10,000 males migrated last year to British North America to engage in agricultural work. The total number of emigrants from the British Isles in 1924 to other parts of the empire was 115,600.

## They're Needed At Home

Perhaps it would be quite in order to invite the 125 U. S. evangelists who are now visiting Great Britain where there are less murders than in one American city with the idea of telling the British people how to live, to visit their own country and straighten out this business of lax law enforcement.—Toronto Saturday Night.

## Reasonable

Applicant—"I want some advice about my husband, sir. He's left me 25 years ago and I ain't seen him added."

## Magistrate—"Well"

Applicant—"What about me 'aving a separation?"

The degree of his scorn for those lower down reveals how recently he climbed up.

It is a well-known fact that with the introduction of public water supplies in cities and towns which had previously been dependent on domestic wells, the death rate from typhoid fever, the most serious of water-borne diseases, had decreased to a remarkable extent.

In our country districts, however, where the scattered population makes the establishment of a public water supply system impossible, the farmer is forced to depend upon his own domestic source, which is, in most cases, the shallow well. That such a well can be a source of positive danger from typhoid, dysentery, diarrhoea and other disorders has been amply proven, but still many farmers do not realize fully the importance of a pure unpolluted water supply, or the danger to their families and their stock lurking in contaminated water.

The location of the farm well is frequently faulty and denotes a lack of knowledge of the danger to health from water when there is any chance of drainage or leaking from any source of pollution as—barnyards, cesspools, privy, manured fields, sink drains, etc. Not only should the well be placed at a reasonable distance from such sources of filth (say 40-50 yards), but also, if possible, on higher ground. The more porous the ground, the greater should be the distance from any contaminating source.

Even when the well is removed from any source of pollution, the ground water should be made to filter through at least 12 to 15 feet of soil before entering the well. Soil tends to remove germs and impurities from surface washings. The water, however, should be made to really filter through the soil by insuring that the sides of the well, for a depth of 12 to 15 feet, are tight and impervious to water. The top, naturally, should be so constructed that no contamination can possibly enter.

Water may be seriously polluted without showing this by its taste or appearance. A bright, sparkling water is by no means a guarantee of a pure supply. When, however, water from a well becomes cloudy or turbid after a heavy rain, there is evidently some defect, for this condition indicates that surface washings are entering without proper filtration.

The divisions of bacteriology and chemistry at the central experimental farm will analyze water samples submitted by farmers living within a reasonable distance. Application for instructions as to taking the sample should first be made.

## Record Oat Yield

Ottawa Experimental Farm Harvested 89 1/2 Bushels Per Acre

The largest yield of oats ever secured from the fields of the central experimental farm at Ottawa, was harvested this year, according to a statement issued by farm officials. "A one-acre field, of banner oats. These oats were grown on a three-year rotation of corn, oats, and clover. For the corn crop, which preceded the oats, a dressing of farm manure was applied. No manure or fertilizers of any kind were applied for the oats.

Another acre of banner oats in a four-year rotation of corn, oats, clover and timothy yielded 93 bushels per acre. As in the former case, no manure or fertilizers were applied for the oat crop, but the corn crop which preceded was given a good dressing of farm manure.

## Covers Require Nailing

"Much of the butter being exported from Canada, particularly through shipments from inland points, is being exported without the covers of the boxes being nailed," says the latest Dairy News Letter issued by the dairy and cold storage branch. "It is highly desirable that covers be nailed, putting one box nail through each corner of the cover. If the covers are nailed in this manner, fewer will come off and be known as handling."

Women are naturally foolish because they were made to match the men.

Among the great works of faith is the instalment plan.

## WORLD HAPPENINGS BRIEFLY TOLD

Since 1915 two billion dollars in overdue income tax and delinquent penalties have been collected in the United States.

The aeroplane service of the European Union, comprising 16 aerial navigation companies, is to be continued during the winter this year for the first time.

Mrs. Isabella Forke, mother of Robert Forke, leader of the Progressive party in the House of Commons, died at the latter's home in Pipestone recently, aged 91 years.

Provision that one-third of his million dollar estate be used for the relief of school teachers, was a feature of the will of the late Simon Gratz, Philadelphia.

Field-Marshal Bruce Plumer, new British high commissioner for Palestine, has arrived at Jerusalem and taken the oath under the commission of Palestine.

Professor Batista Grassi, the famous bacteriologist and physician, died recently at the age of 70. He was widely known in the international medical world as an investigator of malarial diseases.

The London Daily Mail says the British Government has ordered the arrest of all Communists concerned in plots which have been brought to light during the past few weeks to influence troops at the Aldershot camp and elsewhere.

The "newsboy plan" is the latest aerial stunt. A Springfield, Ill., newspaper tried delivery of papers by dropping them at the farmers' doors from an aeroplane, and three-fifths of the farmers reported safe arrival of their papers.

The chimneys of "Big Ben" in the Parliament Buildings at London were heard plainly in San Francisco over special telegraph and cable circuits.

Sir Francis Lewis Castle Phipps, London, permanent secretary of agriculture and fisheries since 1920, has been appointed a member of the overseas settlement committee.

## Printer's Sick Stomach and Headaches Almost Cost Job

Mr. K. M. Collins of Woodhaven, N. Y., says, "Instead of plodding through my work wearily on account of sick headaches and sour stomach, I now enjoy good health and ambition, can do more and better work and live out my years in ease. I have never before given my name to advertise a medicine, but you cannot imagine how different I feel since I discovered Carter's Little Liver Pills."

Carter's Little Liver Pills tone the whole system through the liver and bowels. They act as a mild and effective laxative, in a gentle manner wide out any bad after effects.

Recommended and for sale by all drug stores.

W. N. U. 1504

## Ontario Makes Drastic Laws For Motorists

Must Obtain Driving Permits and May Have to Pass Examination

Every man and woman who drives a motor car in Ontario next year will first have to obtain a driving permit. Hon. S. Henry, minister of public works and highways, told the annual meeting of the Canadian Automobile Association at Toronto.

The issuance of these permits would, in all probability, in due course be followed by compulsory examination for all drivers, he said. Any conviction for traffic act infractions registered against a motorist would be entered on his permit and could lead to the permanent revocation of license to drive.

## May Abandon Dirigibles

U. S. Government Virtually Decides to Concentrate on Aeroplanes

The Shenandoah disaster probably will result in temporary, if not complete abandonment by the government of its lighter than air activities.

The Los Angeles may be sold for what it will bring, the Lakehurst air station probably closed, helium extraction will be curtailed and from now on appropriations and energies will be concentrated on aeroplanes.

The programme had virtually been decided for reasons of economy, before the loss of the Shenandoah, and with this new proof of the vulnerability of dirigibles seems more certain than ever to be adopted.

## Charming Envelope Chemise

When it comes to undergarments you can be just as frivolous as you please. Just a few running-stitches, a bit of hand-embroidery and some dainty lace and ribbon, and you have a choice bit of underwear of your very own making. The diagram pictures the simplicity of the step-in chemise above, which may be scalloped at the lower edge or left plain. The sides of both the front and back are cut in over the hips and slightly gathered to the upper part, insuring a perfect fit. Sizes 36, 40 and 44 inches bust. Size 36 bust is suitable for 34 and 36, size 40 for 38 and 40, and size 44 for 42 and 44. Size 36 bust requires 1 1/2 yards of 36-inch or 40-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

## SUNDAY SCHOOL LESSON

SEPTEMBER 20

PAUL WRITES TO THE THESSALONIANS

Golden Text: In everything give thanks. I. Thessalonians 5:18. Lesson: I. Thessalonians 1 to 5. Devotional Reading: II. Thessalonians 1:13-17.

The Text Explained and Illumined Paul's motives were genuine, wrote 1, 2—"You yourselves, brothers, know that our mission to you was a success," Paul writes, the Thessalonians. "Although at Philippi we had suffered greatly and had been insulted (recall the scourging and imprisonment there, lesson IX), yet on we came to our city and boldly declared to you the gospel of God in spite of great opposition." Recall the words of Jesus in Mt. 10:23. "We waxed bold in our God," thus Paul asserts that the strength to persevere in spite of suffering was divinely given. And his argument here is that had his motives not been the best, he would not have persevered in his work under such untoward circumstances. "You never understand Paul aright," as Professor Ramsay says, "unless you estimate his action on the highest plane of human motives."

For the students which led Paul to make this defense of his motives and methods as a missionary, turn to the Suggestion for Beginning the Lesson, First Topic.

"Looked at as a whole, this passage warns us against slanders. Paul was slandered; they said he was a very smart man, who looked well to his own interest and made deeds of simple people. The deliberate wickedness of such falsehoods is diabolical, but it is not so very rare. Numbers of people who would not invent such stories are glad to hear them. Be on your guard against sympathy with detraction. Never give utterance to a suspicious thought. Never repeat what would discredit a man, if you have only heard it and are not sure it is true; even if you are sure of its truth, be afraid of yourself if it gives you any pleasure to think of it. Love truth, no evil; love rejoicing in not iniquity" (Dr. James Denney).

Like a Grip at the Throat. For a disease that is no chance at fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

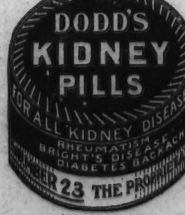

Some men are so unlucky that if an earthquake should break out it wouldn't swallow the land until the day after they had paid the taxes on it.

Sores. Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

In the long buried city of Ur of the Chaldees, a piece of sculpture has been dug up, showing a lively picture of workmen carrying mortar up ladders.

## Minard's Liniment For Distemper

A British ship building firm predicts that motorships will replace steamships. It is building 13 large vessels which will be operated by gasoline motors.

## Find Graves Of

Massacred Christians Believed To Be Victims Of Japanese Revolution In 1937

Dr. Earl R. Bull, Methodist Episcopal missionary in charge of work in Loo Chow Islands, Japan, has discovered the burial ground of 11,000 Christians, believed to have been killed in an uprising during the revolution of 1937.

An inscription found near the grounds by Dr. Bull states that in all 33,000 Christians were slain, beheaded and buried.

The heads of the victims were buried in one spot and the bodies carried to another place, so there would be no chance of their unlying again, the inscription said.

The massacre practically wiped out all the Catholic converts in the country.

A handy size package for occasions when half a pound is "just right."

## OUR CROSSWORD PUZZLE

- |                               |                                   |  |
|-------------------------------|-----------------------------------|--|
| Horizontal                    | 43—Part of "to be."               | 9—Ireland.                                 |
| 1—Gave forth loud             | 46—In that manner.                | 10—Measure of time.                        |
| 2—Negate.                     | 47—Fourth note of diatonic scale. | 11—Profounder's mark.                      |
| 3—Foregoes.                   | 48—Largely crowd.                 | 12—March.                                  |
| 4—Plant much used for soups.  | 49—Self-respect.                  | 13—Revolves.                               |
| 5—Freeze.                     | 50—Long slender marine fish.      | 14—Pacifier.                               |
| 6—Nostril.                    | 51—Ardor inspired by enthusiasm.  | 15—Revolve.                                |
| 7—Determine.                  | 52—Single unit.                   | 16—Frank.                                  |
| 8—Notable achievement.        | 53—Running knots.                 | 17—Pacific island of the Polynesian group. |
| 9—Northwestern state (abbr.). | 54—Holding road.                  | 18—Large cupolas.                          |
| 10—Prefix meaning again.      | 55—Public road.                   | 19—Summit denoting full of.                |
| 11—Provided that.             | 56—Blatance of Burns.             | 20—Single seed of corn.                    |
| 12—Opposed.                   | 57—Desires earnestly.             | 21—Wraith.                                 |
| 13—Ditch around a castle.     | 58—Cast the feathers.             | 22—Passage charge.                         |
| 14—Greek letter.              | 59—Impede.                        | 23—Decay.                                  |
| 15—Thoroughfare.              | 60—Low resort.                    | 24—Aeriform fluid.                         |
| 16—European country.          | 61—Point of compass.              | 25—Act.                                    |
| 17—Combined dead body.        |                                   |  |
| 18—Pedal extremities.         |                                   |  |
| 19—Self.                      |                                   |  |
| 20—Damp.                      |                                   |  |
| 21—Widow.                     |                                   |  |
| 22—Weird.                     |                                   |  |
| 23—Holds back.                |                                   |  |

## Turks Abandoning Old Customs

Officials Must Wear Hats and Dress Like Europeans

More and more the newly-born Turkish Republic is abandoning old Turkish customs and substituting European methods, while the fox and turban as national headgear seem to be going into the discard. The council of commissars has decreed that all officials must dress in European fashion and wear hats.

Only priests are to be permitted to wear turbans and they must uncover within government offices.

The Oil of the People.—Many oils have come and gone, but the Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

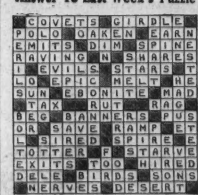

## Demand For Domestic

Saskatchewan Farmers' Wives Are in Need of Household Help

Saskatchewan farmers' wives are looking anxiously for the household help which the Bureau of Labor and Industries of the Provincial Government arranged to be sent to them from the British Isles under the Imperial Government overseas settlement scheme. The bureau contracted for 100 domestic to be sent to Saskatchewan during the year and barely half have arrived. Most of the demand is from farm women.

### Wheat Pool Starts Campaign to Secure 10,000 New Members

Campaign Now Under Way on  
Different Basis, Will Continue  
Until End of Year, and Canvassers  
will Be Paid for their Work  
—Delegates and Local Secretaries  
are Eligible to Participate  
and Receive Commissions.

Alberta grain growers are advised that  
the Alberta Wheat Pool has inaugurated  
a new campaign for membership and  
that this campaign is being conducted on  
a different basis than others in the past  
either in Alberta or the two other prairie  
provinces.

The wheat pool idea had its genesis in  
this province. Here the original plan  
was worked out. The legal details in  
connection with incorporation, the mem-  
orandum of association, the members  
agreement and the bylaws, were first  
considered in Alberta, and, when care-  
fully perfected, were the basis for the  
organizations subsequently brought into  
existence in Saskatchewan and Mani-  
toba.

Much of the success of the pool method  
of marketing in western Canada is attrib-  
utable to the infinite care that was  
exercised in Alberta at the beginning  
when those in charge of organization  
had this work in hand. Alberta paved  
the way. The wheat pool here has made  
remarkable progress. It has won the  
confidence of the people of this province.  
Those who entered it at the beginning  
are satisfied, and thousands who then  
waited to see how things would turn out  
have since been so impressed that they  
have joined the pool for the balance  
of the term of the contract, namely, until  
crop of 1927 is marketed.

#### Canvassers to Be Paid

The success of the last two years has  
encouraged the directors of the wheat  
pool to authorize a new canvass for mem-  
bers at this time. This campaign is now  
begun and it will be carried on till the  
end of the year. In the past all canvass-  
ing had been done voluntarily with no  
payment for services rendered, but pres-  
ident H. W. Wood and the board of  
directors feel now that it would be un-  
fair to ask the workers of other cam-  
paigns, or now workers, to undertake

further work along this line without  
some payment to offset the time lost and  
expense entailed in the task of securing  
contracts.

This membership campaign is there-  
fore open to anyone who wishes to join  
in the canvass, but no commission will  
be paid to any member of the board of  
directors or to any employee of the asso-  
ciation. Delegates and local secretaries  
are eligible to participate in the canvass  
and to receive commissions.

\$1.50 Per Contract

The commission is \$1.50 per contract.  
If the membership fee is paid in cash  
—the fee is \$3— the canvasser may re-  
mit \$1.50 to the head office in Calgary  
and retain the balance as his com-  
mission. When the note form is signed  
by the grower on the contract sent in  
the sum of \$1.50 will be sent by the  
head office to the canvasser, but it  
must be a bona-fide wheat producer of  
the province, the contract must be  
complete as to full name of the grower,  
his address, location of land and num-  
ber of acres sown to wheat in 1925, and  
the signature properly witnessed.

In all cases contracts must be accom-  
panied by a canvasser's report, properly  
filled out, with the full name of the can-  
vasser, and address, properly signed.  
This is necessary so that the head office  
may send the commission to the proper  
party.

Contract forms, canvasser's report  
forms, and self addressed envelopes are  
being sent to all wheat pool delegates,  
wheat pool local secretaries, secretaries  
of U.F.A. locals, and municipal secre-  
taries, to any of whom canvassers may  
apply for supplies, or they may send for  
supplies direct to the head office of the  
pool at Calgary.
